

# Pudding Pops

Be sure to get an adult's help.

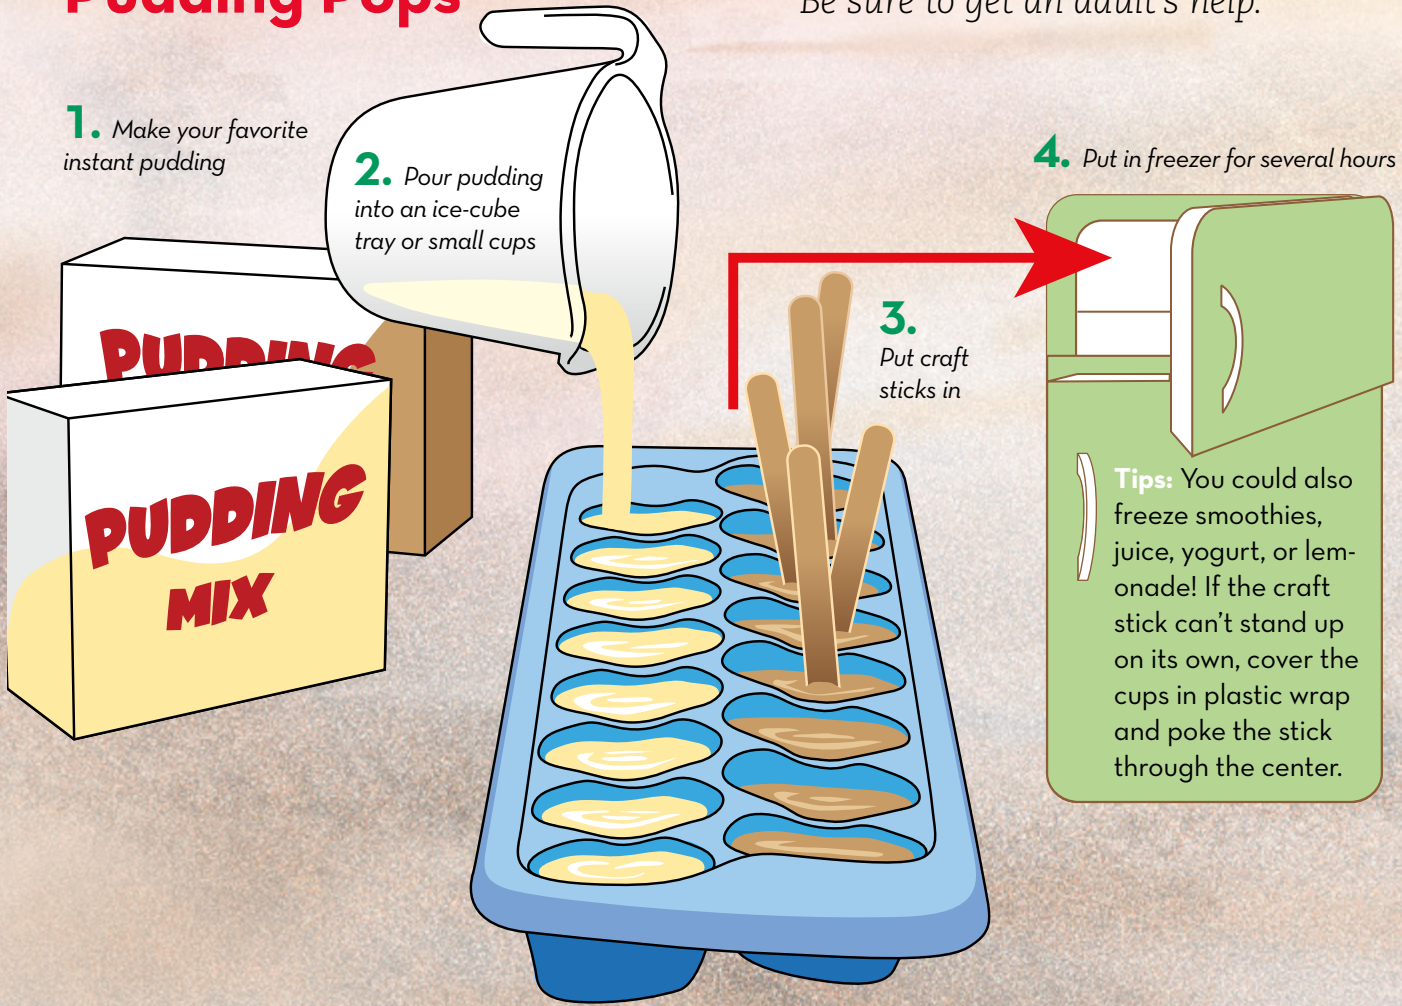

1. Make your favorite instant pudding

2. Pour pudding into an ice-cube tray or small cups

4. Put in freezer for several hours

3. Put craft sticks in

**Tips:** You could also freeze smoothies, juice, yogurt, or lemonade! If the craft stick can't stand up on its own, cover the cups in plastic wrap and poke the stick through the center.

## Picture Perfect

Here's something else you can do with craft sticks! Glue them together to make a frame for a special photo. Be creative! Try layering the sticks and using different shapes and patterns. When the frame has dried, decorate however you'd like. Then glue in the photo.
