

Flower Crawl

Help this caterpillar reach the other side of the flower patch. It can only move to a new flower by adding 4 or subtracting 2. It can also only move up, down, left, or right—not diagonally. The first move is done for you ($3 + 4 = 7$).

START 3	7	12	14
9	5	19	17
13	11	15	21
19	7	12	25 FINISH

I just love a good picnic. Our lunch should show up any minute!
