

Sacred MUSIC

for iOS

THE SACRED MUSIC APP

is a quick and easy way to look up the hymn you are about to sing. But, there is so much more to it than that!

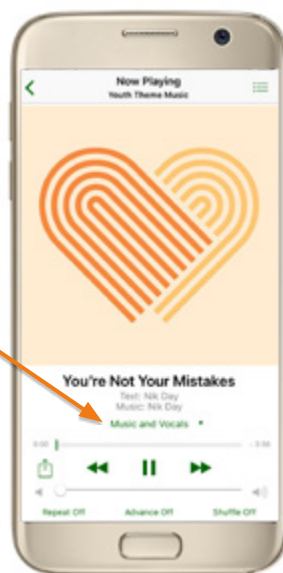

Want to learn how to play "You're Not Your Mistakes" (or any other song from the Church) on the piano?

Just download a PDF from the music on the app and start learning! You can even keep the song playing in the background as you plunk out the notes.

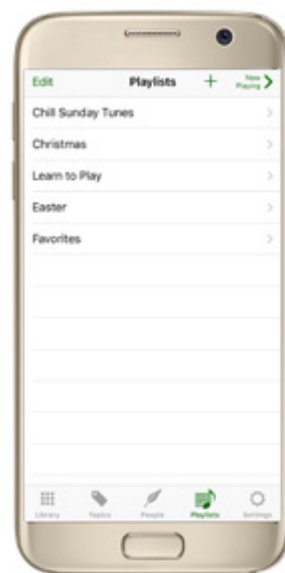

It's your turn to pick the hymn for family home evening?

There is a whole section of the app that is organized by topic. You can quickly find a song about honesty to go with the home evening lesson.

Feel studying is impossible without background music?

With the app, you can listen to most songs with music and vocals or music only. Turn the vocals off and listen to some instrumental music to get your brain working.

Need the perfect playlist?

If you've ever spent an afternoon sorting through music trying to make a good Sunday playlist, you need the Sacred Music app. All the music here is uplifting, and you can make multiple playlists to fit your mood.

"It really matters what you listen to. . . . Select music that will strengthen your spirit."

President Russell M. Nelson, Oct. 1985 general conference (*Ensign*, Nov. 1985, 32).

Look and user experience may vary by device and operating system. The Sacred Music app was formerly known as LDS Music.
